

Clark Forklift

Performing globally, there are at this time 350,000 Clark forklifts and lift trucks in operation, with more than 250,000 of those operating in North America. Clark has five major lines of lift trucks across the world, making it one of the most expansive organizations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, duel fuel, petrol, LPG, hand-driven lift trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift, handles more than 120,000 specific components intended for 20 unique designs of lift trucks and automated equipment. Your local Clark Seller is your total source for availability of all your components requirements offered by Clark Totalift.

Clark features a exceptional Parts Supply team. The items warehouses are conveniently located in Changwon, South Korea and Louisville, Kentucky to guarantee exceptional service to both their buyers and their dealers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing manufacturers. Driven to offer the highest level of value and service to our customers, Clark remains on the cutting edge when it comes to enhancing productivity and benefiting performance.

Worldwide, Clark has one of the most outstanding dealer support networks. With over 550 locations globally, seller representation in over 80 nations and 230 locations in North America, their high level of commitment to their customers predominates the material handling market.

Clark proudly remains an progressive leader of the industrial equipment industry, pioneering protection features such as the worker restraint system. This exceptional dedication to safety is at this time a standard feature on every lift truck.

Clark's continual effort to have the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 — Clark, is the first lift truck maker across the world to be certified with the internationally approved quality standard ISO 9001 for all of their manufacturing facilities. Additionally, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be prepared for any number of environmental limitations, thus placing them in a prevailing industry position.

Lean Production

Clark has selected the very economical and beneficial system of "Lean Production" for its assembly plants and use of resources. This structure was developed to acknowledge the most effective method of production facility stewardship and ensuring maximum proficiency. Clark has concluded this transition of its Korean plant. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

Engine Design

By working in concert, Clark's product suppliers and engineers communicate towards improving product proficiency while minimizing costs. The new value engineering agenda combines innovative product growth and delivers superior customer support and service within the industry.
