

## Red Deer Aerial Lift Train the Trainer

Red Deer Aerial Lift Train the Trainer - The train the trainer program for aerial lifts helps to teach the trainers how to safely train potential operators in an industrial situation. Trainers would be provided with in-depth instruction about the workings of aerial lift machines. The program is offered on an open enrollment basis and delivered at select training places. Before the certification, trainers are assessed and graded on their knowledge and demonstrated skills.

The Aerial Lifts Train the Trainer Certification Program focuses on practical learning and as the best training provider within the industry, we offer top notch hands-on training. We provide plenty of chances to practice the techniques and concepts that are learned within the classroom. Along with hands-on experience, trainers develop general understanding of equipment theory and instructional techniques, classroom and field communication skills, and ability to effectively train and evaluate operators. Trainers would gain knowledge about what traits make an effective trainer.

The Aerial Lifts Train the Trainer Program also teaches the proper techniques required to express the right information within the classroom and field setting. There are three factors of machinery operation that the trainer must learn how to convey to operators: what to perform; how to do it; and why it should be done.

The program provides up-to-date, detailed reference material to be able to help trainers convey the subject matter to machine operators. Instruction manuals include detailed information regarding all aspects of industrial mobile equipment operator training. Included within the package are training aids that provide a visual reference in order to improve the learning experience. The equipment-specific training products contain necessary materials intended for both the trainer and the operator: videos/DVD's, overhead transparencies, safety message posters, kinds of equipment; stability pyramids and digital training aids.
