

Red Deer Bucket Truck Training

Red Deer Bucket Truck Training - The bucket truck training program is a program that is intended to effectively train operators who are qualified so they could reduce the risk of personal injury and incident when working in close proximity to or with bucket trucks or likewise referred to as vehicle-mounted aerial work platform. An aerial lift device is whichever vehicle-mounted device, telescoping or articulating, or both, which is utilized to position workers to reach places which will otherwise be inaccessible. Aerial lift devices are made use of in order to elevate personnel to above-ground work sites.

The program aims to provide operators with the knowledge, skills, training materials and abilities required in order to safely and efficiently operate vehicle-mounted aerial work platforms.

The program includes a hands-on training session and a classroom training session. To become certified, participants should be successful in both components. A full-size certificate and a wallet-size certificate would be given upon completing the program.

Types of lifts include extensible boom platforms, articulating boom platforms, aerial ladders and aerial ladder trucks, vertical towers and any combination of these devices. Aerial lift devices are normally made of metal, wood, reinforced plastic, fiberglass or other materials.

Definitions

Articulating boom platform: has at least 2 hinged boom parts.

Extensible boom platform: has either an extensible boom or a telescopic boom.

Platform: the part of an aerial device that is designed to carry workers.

Mobile unit: a combination of aerial devices, like for example its vehicle and related machine.

Employers have the responsibility to make certain their employee acquire right training before operating aerial devices. Workers should make certain they likewise receive the required training and that they do not operate lift devices if they are not authorized to do so. Workers should ensure that they wear the proper protective equipment if working from the platform.

Course content comprises operation of the vehicle-mounted aerial work platform, pre-shift inspection, safe operating practices, lifting capacity, use of emergency controls, and administering theory and practical tests. Operators will know rules under the local and federal regulations.
