

Red Deer Manlift Ticket

Red Deer Manlift Ticket - The Elevated Platforms and Manlifts Certification program helps to provide the needed training on the safe operating procedures, work practice, regulations and rules regarding the daily activities for the operators of this machinery. The program has been designed for people who are actively involved in these activities or those who have a basic knowledge of this machine.

During the last couple of decades, aerial platforms and manlifts have become a common sight in industrial maintenance applications and on construction job sites. These machinery provide an easy way to lift workers near what needs to be done on a stable platform apparatus, enabling workers to perform tasks with greater comfort and safety rather than being perched on top of scaffolding or ladders.

The manlift is similar to other industrial devices in that they are safe when utilized properly. As they elevate workers above ground level or floor, accidents could easily happen and this might cause serious injuries or death for both the operators of the manlift and any passerby who may be unlucky enough to be standing below.

There are a variety of kinds of manlifts. Nearly all fall into 1 of 2 categories: the articulating boom lift, that has the capability of both vertical and horizontal movement and the scissors lift, that is capable of moving upward and downward.
